

ANCILLARY OVERVIEW

Welcome to the Ancillary Section.

Ancillary Services are services over and above physician services, including, but not limited to laboratory, radiology, physical therapy, home health and skilled nursing facilities. Ancillary services fall into three broad categories: diagnostic, therapeutic and custodial.

In this section you can find the following:

- At-a-glance grid of Hospital Provider listing by health plan
- At-a-glance grid of Outpatient Surgery Facility listing by health plan
- At-a-glance Physical Therapy Provider listing by health plan
- At-a-glance Radiology Provider listing by health plan
- All other Ancillary contracts listed by health plan in alphabetical order

It is the contracted Santé Physician's (primary care physician or specialist---whom ever is requesting the service) responsibility to direct the patient to an in-plan ancillary provider when needed.

Please be sure to refer to the Prior Authorization list in the Utilization Management Section for services that may require prior authorization.
